VALID FROM: 1 SEPTEMBER 2024
OBLIGATORY FROM: 1 SEPTEMBER 2024

## INTRODUCTION: Cost of implementation

This document forms part of the GLOBAL S.L.P. normative documents and may be referenced in other GLOBAL S.L.P. documents.

The costs for GLOBAL S.L.P. certification consist of the following:

- Costs for implementing the standard: Each farm is unique, so depending on their specific situation, some farms may need to implement new policies, processes, and installations to comply with the standard.
- Service fees to the certification body: Costs for the audits, inspections or assessments (time, travel costs) and services provided by the independent certification body are negotiated directly between the producer and the certification body and depend on individual price policies, duration of the on-farm activity, travel costs, time needed for preparation, and follow-up.
- GLOBAL S.L.P. fees: These fees are charged by the GLOBAL S.L.P. Secretariat via the certification bodies. They are described below in the following chapter (registration fee, certificate license fee, and assessment license fee).

### Calculation of the fees

The GLOBAL S.L.P. fee calculation is based on the type of the standard/add-on or the kind of assessment (e.g., Integrated Farm Management or Animal Welfare), the scope (e.g., Livestock), the product (e.g., boiler chicken,), and often also the production quantity (e.g., 1,000 tons).

Prices are listed in the following chapter per standard or type of assessment. More detailed explanations about the fee calculation including examples can be found after the price lists.

## GLOBAL S.L.P. Integrated Farm Management

**REGISTRATION FEE**

### Livestock (except dairy production)

| Annual Production Meat [metric tons, live weight] | | | Annual Fee |
